ABOUT

Full-Stack Mobile Developer with over 3 years of experience architecting and delivering end-to-end, high-performance mobile applications. Highly proficient in leveraging advanced AI coding environments (*Cursor, Claude Code, Gemini, Codex*) to accelerate development cycles, and engineering custom AI agents like Hermes to automate complex operations via Model Context Protocol (MCP) integrations. Expert in cross-platform mobile development utilizing Flutter and Dart, seamlessly integrated with robust backend architectures using Supabase, Firebase, PostgreSQL, and Node.js. Proven track record of building production-ready mobile platforms powered by cutting-edge Generative AI APIs, translating complex business requirements into clean, scalable code.

EXPERIENCE

Portofolio : firdanumar.com

Moon Apps - Remote (Turkey)

Full-Stack Mobile Developer (November 2025 – July 2026)

- Led the end-to-end development lifecycle for a diverse portfolio of AI-driven applications (including LifeOS, MusicAI, and Text RPG), managing everything from MVP database design and custom UI slicing to comprehensive automated testing.
- Scaled application monetization across the entire project portfolio by architecting and implementing secure, real-time In-App Purchases (IAP) and subscription gating via RevenueCat integrations.
- Architected complex AI-driven features—such as AI music synthesis, prompt-based video generation, and dynamic interactive storylines—by integrating Google Lyria, Gemini Vision, Veo, and LLM APIs via serverless Cloud Functions and FFmpeg pipelines.
- Accelerated development velocity and optimized MVP delivery cycles by aggressively leveraging AI coding agents (Cursor, Claude Code, Agent Hermes) for rapid UI slicing, robust database design, and automated refactoring.
- Developed a global telecommunication module integrating the Sinch API to handle end-to-end virtual fax operations and document processing seamlessly.

PT Bengkel Aplikasi Nusantara – Bandung, Indonesia

Full-Stack Mobile Developer – Automation Engineer (Mei 2023 – November 2025)

- Solely managed the end-to-end deployment cycles and live releases for robust mobile applications, including Suluk and Travelogi, directly handling all App Store Connect and Google Play Console operations.
- Streamlined cross-team deployment operations and minimized production errors by building and maintaining robust CI/CD pipelines via Codemagic, overseeing test distributions on TestFlight.

PDF

- Developed and secured a high-traffic PPOB platform with payment gateway integrations, alongside a comprehensive HR Attendance System featuring interactive analytics

dashboards.

- Architected a fully automated digital content pipeline using n8n, eliminating manual overhead for topic ideation, caption generation, and publishing, saving the team over 15+ hours of manual work per week.
- Maintained strict code quality and cross-project scalability by implementing Clean Architecture principles and advanced state management solutions (BLoC, Provider).

PT Langgeng Sejahtera Kreasi Komputasi – Bandung, Indonesia

Intern Mobile Developer (Januari 2022 – Juni 2022)

- Developed high-performance IoT mobile applications for home automation and smart watering systems, enhancing automation efficiency.
- Created specialized tools including Smart Card Saga and Smart Watering to improve real-time device monitoring and data analysis.
- Integrated RabbitMQ for real-time, asynchronous communication, heavily boosting system stability and network responsiveness.
- Implemented SQLite for efficient local data storage, enabling reliable offline mobile-IoT functionality.
- Collaborated closely with multidisciplinary teams, effectively aligning hardware constraints with software development for faster production delivery.

EDUCATION

Universitas Pendidikan Indonesia (2023 – Present)

Software Engineering – GPA: 3.79

SMK Negeri 2 Bandung (2020 – 2023)

Software Engineering – Final Grade: 89

SKILL

- **Languages & Frameworks:** Flutter, Dart, Next.js, React, TypeScript, Node.js
- **Backend & Database:** PostgreSQL, MySQL, Drizzle ORM, Supabase, Firebase, RabbitMQ, SQLite
- **AI, Agents & Automation:** Agent Hermes, Cursor (MCP Configurations), Claude Code, Gemini, Codex, n8n
- **Architecture & CI/CD:** BLoC, Provider, GetX, Clean Architecture, Turborepo (pnpm), Codemagic, App Store/Play Store Deployment
- **Soft Skills:** Critical Thinking, Teamwork, Communication, Leadership, Problem Solving, Adaptability
